PROFESSIONAL SUMMARY

Motivated Front-End Developer with foundational experience building responsive, user-friendly web applications utilizing HTML5, CSS3, JavaScript, and Java. Passionate about writing clean, maintainable code and architecting visually appealing, accessible digital interfaces. Demonstrates a strong understanding of responsive web design frameworks, modern development workflows, and cross-browser optimization techniques. Seeking to leverage technical skills in freelance or entry-level roles to build scalable and high-performance web solutions.

TECHNICAL SKILLS

Languages:	HTML5, CSS3, JavaScript (ES6+), Java, SQL
Frameworks & Libs:	React, Node.js, Express.js
Databases:	MongoDB, MySQL
Tools & Platforms:	Git, GitHub, VS Code, Netlify, Render, REST APIs, Basic FTP Deployment

TECHNICAL PROJECTS

AI Journal System *(React, Node.js, Express.js, MongoDB)*

- Engineered a full-stack MERN journal application enabling seamless, secure user authentication and session persistence.
- Designed and integrated structured RESTful APIs using Express.js to perform full CRUD operations on secure user data.
- Implemented a responsive interface ensuring complete visual consistency across multiple viewports and device types.

Personal Portfolio Website *(HTML5, CSS3, JavaScript)*

- Conceptualized, designed, and deployed a fully responsive modern personal portfolio application to showcase professional work.
- Utilized advanced CSS grid systems and media queries to optimize UI/UX layouts across desktop, tablet, and mobile platforms.
- Deployed the functional codebase to Netlify, configuring optimized static asset delivery for minimized load latencies.

Resume Builder Application *(HTML5, CSS3, JavaScript)*

- Developed an interactive, front-end application leveraging dynamic form handling to capture structured user information.
- Programmed a dynamic client-side rendering engine allowing users to instantly generate and download formatted PDF layouts.

Weather Application *(HTML5, CSS3, JavaScript)*

- Built a responsive weather application that seamlessly consumes data streams from public external REST APIs.
- Parsed JSON data feeds asynchronously to present real-time localized weather metrics inside an intuitive user layout.

Travel Landing Page (HTML5, CSS3, JavaScript)

- Designed a high-conversion travel landing page utilizing responsive web design principles and modern UI patterns.
- Coded smooth, accessible navigation layouts with custom CSS flexbox containers to ensure high interactive performance.

EDUCATION

Bachelor of Computer Applications (BCA)

Expected Graduation: 2027

Meena Shah Institute of Technology and Management

CERTIFICATIONS & INTERNSHIPS

Course on Computer Concepts (CCC) • Web Development Intern at CodeAlpha

CORE STRENGTHS & COMPETENCIES

Responsive Web Development • Problem Solving & Algorithmic Logic • Clean Code Practices & Documentation • Cross-functional Team Collaboration • Adaptive Fast Learner • Attention to Technical Detail
